

Consumption of the drainage air, that is put to the terms of compressor suction (with the valve el. pneumatic), m ³ /min	1,0
Operating pressure (overpressure) of compressed air MPa (kgf/cm ²)	0,75 ... 0,9 (7,5 ... 9)
Draining degree. Outlet conversion system temperature of dew point of compressed air shall be no less than by 5° C below the ambient temperature.	
Air consumption on adsorbent's regeneration from quantity of drainage air, that put through the dryer, %	12
Condensate unloading valve	electromagnetic
Valve voltage, V	24
Action mode of the valve	normal-open
Overall dimensions, mm	282 * 245 * 570
Weight, kg	24
